EDUCATION

Boston College | Chestnut Hill, MA

Expected May 2026

B.A. in Computer Science - GPA: 3.68/4.0

- **Courses:** Computer Systems, Computer Organization, Software Engineering, Computer Networks, Algorithms, Data Ethics and Society, Tech and Culture, Natural Language Processing*, Operating Systems*

TECHNICAL SKILLS

Languages (ordered by proficiency): Python, Go, JavaScript, C, C++, Java, SQL

Tools and Frameworks: Django (REST Framework), React, Spring Boot, Tailwind CSS, Github, Vercel, Render, Axios, Figma

RELEVANT EXPERIENCE

Boston College Department of Computer Science | Chestnut Hill, MA

Aug. 2025 - Present

Undergraduate Teaching Assistant

- Lead a weekly discussion section of 15+ students for Computer Science 2, clarifying challenging concepts and walking through programming problems in C++.
- Host office hours throughout the week, providing one-on-one problem solving and debugging support for students.

XYZ Homework | Remote

June 2025 - August 2025

Software Development Intern

- Programmed Calculus 1, Calculus 2, Linear Algebra, and Multi-Variable Calculus questions and wrote detailed solutions using the IMathAS assessment tool, PHP, and GeoGebra API integration, ensuring balanced difficulty and accurate solutions.
- Performed peer reviews, correcting errors in the math logic, detailed solutions, and the styling of written questions.

PROJECTS

DevCheck | Personal Project

Jan. 2026

- Designed and built a full-stack React + Django web application to help developers plan, track, and execute full-stack projects from MVP to deployment.
- Implemented a Django REST Framework backend with JWT authentication to manage users, project structure, and checklist progress, using Axios for client-server communication. Deployed the application on Vercel (frontend) and Render (backend) with scalable architecture designed for future feature expansion.

Portfolio Website | Personal Project

Sept. 2025

- My portfolio website developed using React, Tailwind CSS, and Vercel to showcase projects and relevant skills.

PeerAssess | Software Engineering Group Project

May 2025

- A full-stack Django application developed using an agile process with a team of 3 other students that allows BC students to evaluate their peers and receive real-time feedback.
- Personally designed the database structure by building Django model-relationship for the project, and additionally developed the frontend interface for the team management, team creation, and team editing pages.

LEADERSHIP EXPERIENCE

Boston College Campus Activities Board | Chestnut Hill, MA

Sept. 2022 - Present

Operations Coordinator for Trips And Excursions

- Communicate with vendors to plan off-campus activities, create and lead internal bonding experiences for the Trips and Excursions department, and staff campus-wide events aimed at promoting inclusivity for students on campus.

Boston College Freshmen League | Chestnut Hill, MA

Oct. 2025 - Present

Freshman League Captain

- Facilitate and guide weekly discussions with a group of 8 freshmen guys about life at Boston College, including topics such as mental health, classes, and social life.
